Hitachi Healthcare Americas Becomes FUJIFILM Healthcare Americas Corporation

Following the transfer of Hitachi Ltd.'s diagnostic imaging business to Fujifilm Corporation earlier as announced on March 31, 2021 Hitachi Healthcare Americas Corporation will officially take the new company name, **FUJIFILM Healthcare Americas Corporation** with effect from July 1, 2021.

For many years Hitachi Healthcare has been solidifying its capabilities in diagnostic imaging. The drive for innovation and technology is now made stronger than ever, with the new directive. Combining Fujifilm's advanced processing algorithms and robust A.I. technologies, we are in the best position to offer a comprehensive portfolio of imaging solutions that resolves the evolving challenges of healthcare.

As part of Fujifilm we will bring new value in unique and meaningful ways.

About Fujifilm Healthcare Americas Corporation

FUJIFILM Healthcare Americas Corporation is a leading provider of innovative diagnostic imaging products and medical informatics solutions for the evolving needs of healthcare facilities. Its comprehensive portfolio of solutions spans magnetic resonance imaging designed for all patients, computed tomography, and technologically advanced radiology, cardiology, surgical and urology ultrasound solutions. Fujifilm provides healthcare professionals with the image viewing and reporting tools needed to thrive in the world of value-based healthcare with its VidiStar platform. Vidistar leverages a cloud-based image management and analytics platform for improved communication across the healthcare organization. Fujifilm's customer first philosophy drives all of our actions. FUJIFILM Healthcare Americas Corporation is headquartered in Twinsburg, Ohio. For more information please visit hca.fujifilm.com.
